

ONLYOFFICE Docs

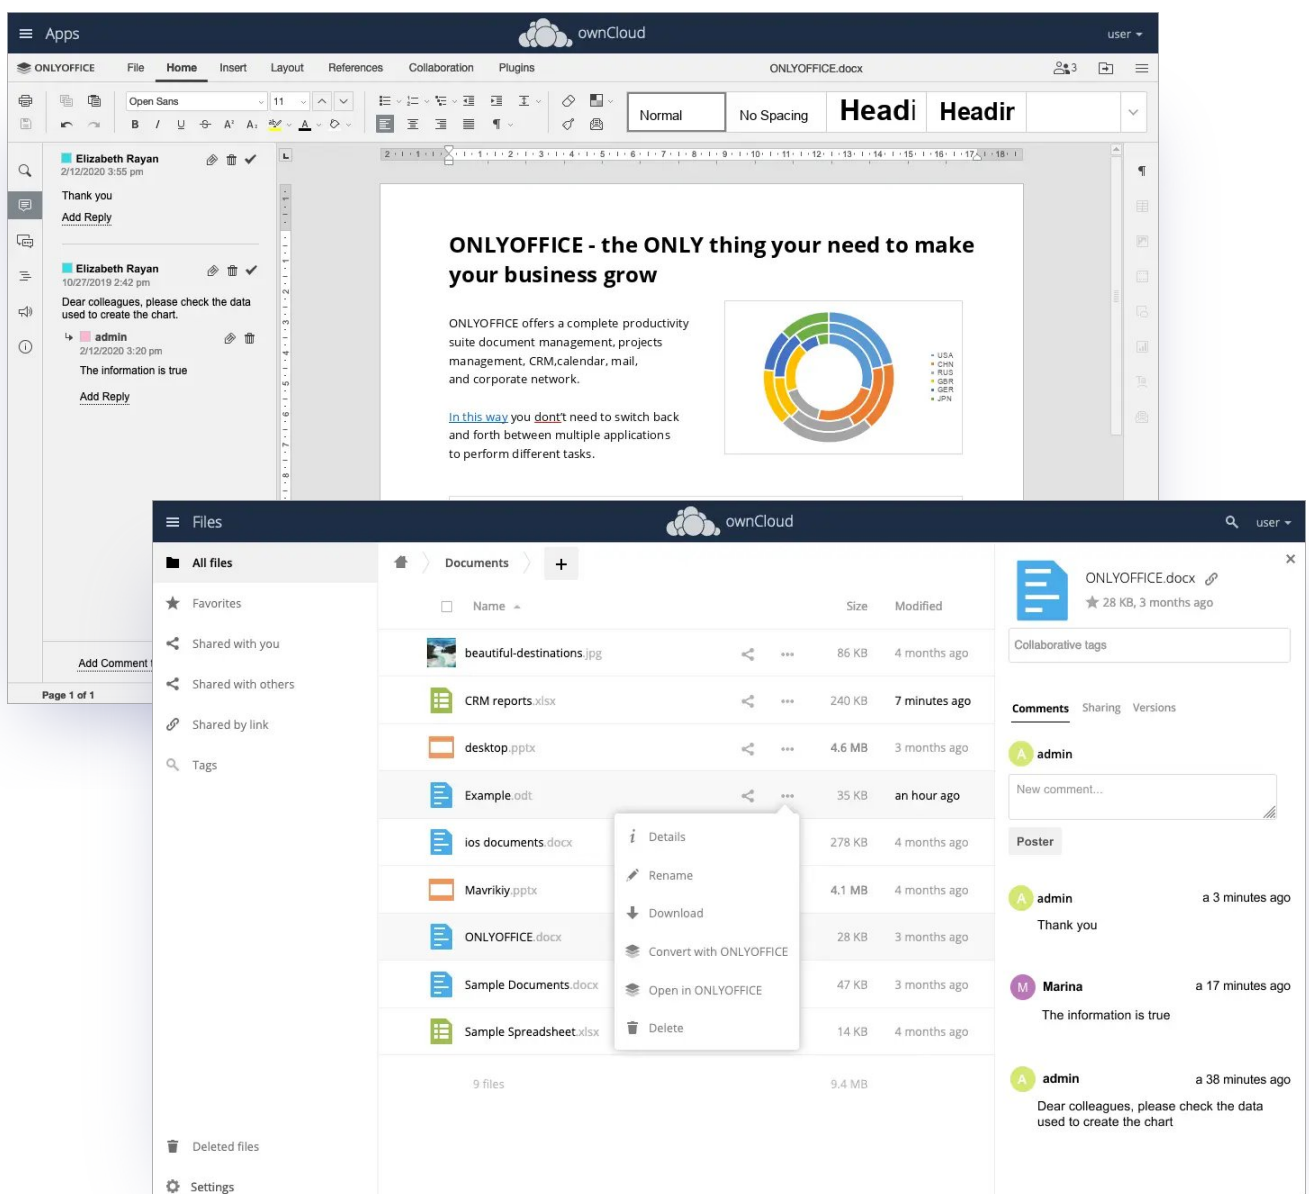

**The most secure way to
co-author corporate documents
in your ownCloud**

ONLYOFFICE Docs

Comprehensive online document editors for your IT infrastructure

With over 7 million users worldwide, ONLYOFFICE is a proven innovator in the online office business. Built on a cutting-edge technology, it provides users with a vast range of editing tools and collaborative features ensuring greater team workflow and seamless work with complex formatting and objects.

As **official technological partners**, ONLYOFFICE and ownCloud offer a combined solution that enables collaborative editing of Microsoft Office file formats from the ownCloud frontend in real time. Teams can safely exchange their work and efficiently co-author text documents, spreadsheets, and presentations. This increases productivity while maintaining full control over sensitive corporate data.

The image displays two overlapping screenshots of the ONLYOFFICE ecosystem. The top screenshot shows the ONLYOFFICE Docs editor interface. The top bar includes a menu with 'Apps', 'ONLYOFFICE', 'File', 'Home', 'Insert', 'Layout', 'References', 'Collaboration', and 'Plugins'. The document title is 'ONLYOFFICE.docx'. The main editing area contains a document with the heading 'ONLYOFFICE - the ONLY thing your need to make your business grow' and a donut chart. The bottom-left sidebar shows a chat window with messages from Elizabeth Rayan and admin. The bottom-right sidebar shows a list of collaborative tags and comments.

The bottom screenshot shows the ownCloud file manager interface. The top bar includes a menu with 'Files', 'ownCloud', and a user dropdown. The main area displays a list of files and folders. A context menu is open over the 'ONLYOFFICE.docx' file, showing options: Details, Rename, Download, Convert with ONLYOFFICE, Open in ONLYOFFICE, and Delete. The right sidebar shows the details for 'ONLYOFFICE.docx', including its size (28 KB) and a list of collaborative tags and comments.

ONLYOFFICE DOCS:

Features overview

Expert-level editing functionality

All operations with fonts and styles, paragraph and text formatting. Inserting and customizing shapes, charts, tables, text boxes, etc. Easier navigation with footnotes, endnotes, cross-references, table of contents, bookmarks. Creating professional-looking forms and templates.

Integrated plugins

Extra functionality you might need: attending Zoom meetings and chatting in Telegram right from the editor, creating bibliographies with Mendeley and Zotero, translating documents, converting text to HTML, embedding YouTube videos, and much more.

Advanced collaboration

Real-time and paragraph-locking co-editing modes, review mode with Track Changes, built-in chat, comments, document comparison, version history.

Support of popular formats

High compatibility with DOCX, XLSX, and PPTX. Support for ODT, ODS, ODP, DOC, XLS, PPT, PDF, TXT, RTF, HTML, EPUB, CSV, and others.

Highest formatting quality

Online editing without any quality loss. Fast processing of multi-page documents.

100% identity

In viewing, editing and printing.

READY-TO-USE ONLYOFFICE CONNECTOR:

Features overview

Basic features

- File creation, editing, saving
- Opening files from the connected external storage
- Editing of the documents shared via public links
- File creation and conversion in public folder
- Inserting images from the file manager
- Save as option

File formats

- All formats support: conversion to OOXML for editing
- Easier work with ODT, ODS, ODP, RTF, TXT, and CSV by auto-converting and opening files directly for editing

Security

- JWT signature
- Restricting access to ONLYOFFICE Docs to user groups
- Advanced sharing permissions: review, fill forms, comment, modify filter
- Restriction on downloading
- Viewing a locked file

Federated Cloud Sharing

- Co-editing between federated cloud instances
- Force Save for federated clouds

Usability

- Ability to customize the editor's interface
- Zoom and auto-save customization
- Setting the default review display mode
- Opening the sidebar with access to the sharing dialogue from the editor
- Ability to use a self-signed certificate
- Mail Merge
- Force Save
- File preview generation
- Saving co-authors' names and local time in Version History

Integration

- Connecting ONLYOFFICE desktop
- Connecting ownCloud in ONLYOFFICE mobile apps

Roadmap

- Custom integration for ownCloud Infinite Scale
- Document templates
- Mentions in comments

EASY TO INSTALL AND INTEGRATE

Well-structured API documentation

Detailed technical information needed for integration.

Various installation options

- Pre-built binaries
- Docker images
- Docker script*

*Also available for automatic installation of the combined ownCloud-ONLYOFFICE Docs solution.

Available as Univention Virtual Appliance

ONLYOFFICE Docs can be installed in combo with ownCloud as a pre-configured virtual machine, which doesn't require deep technical expertise.

Demo server

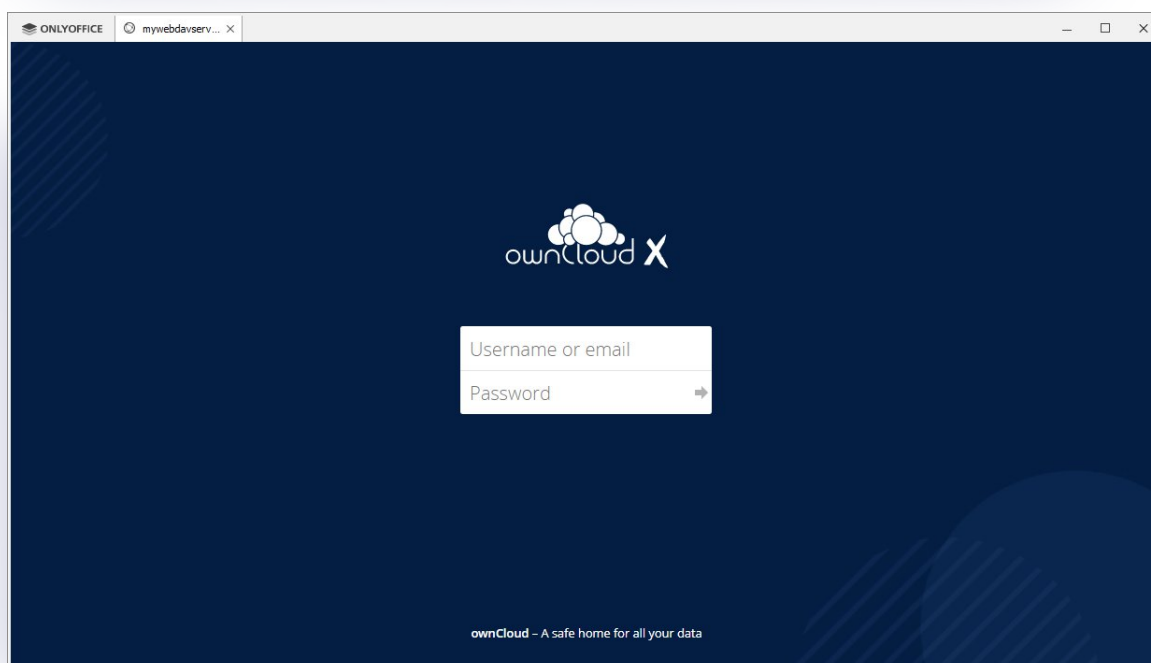

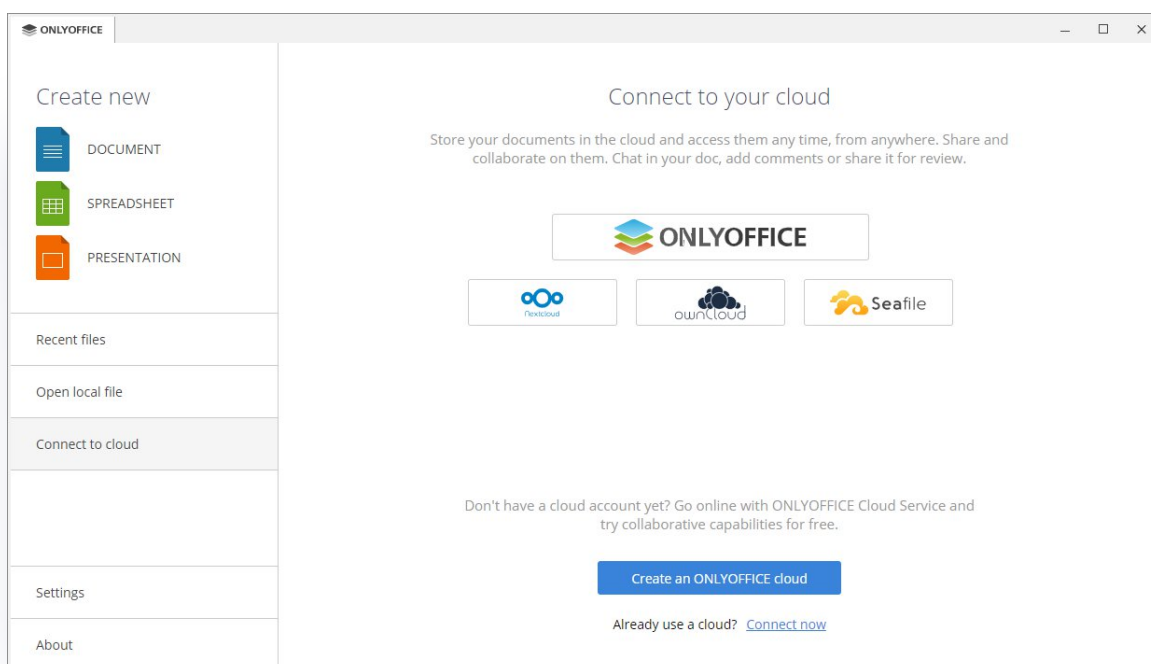

You are able to test ONLYOFFICE Docs within ownCloud for 30 days without actually installing the editors. To do so, you only need to get ONLYOFFICE integration app and activate the connection to the demo serve.

Connect free ONLYOFFICE Desktop Editors to your ownCloud

For Windows/Linux/macOS

You will get:

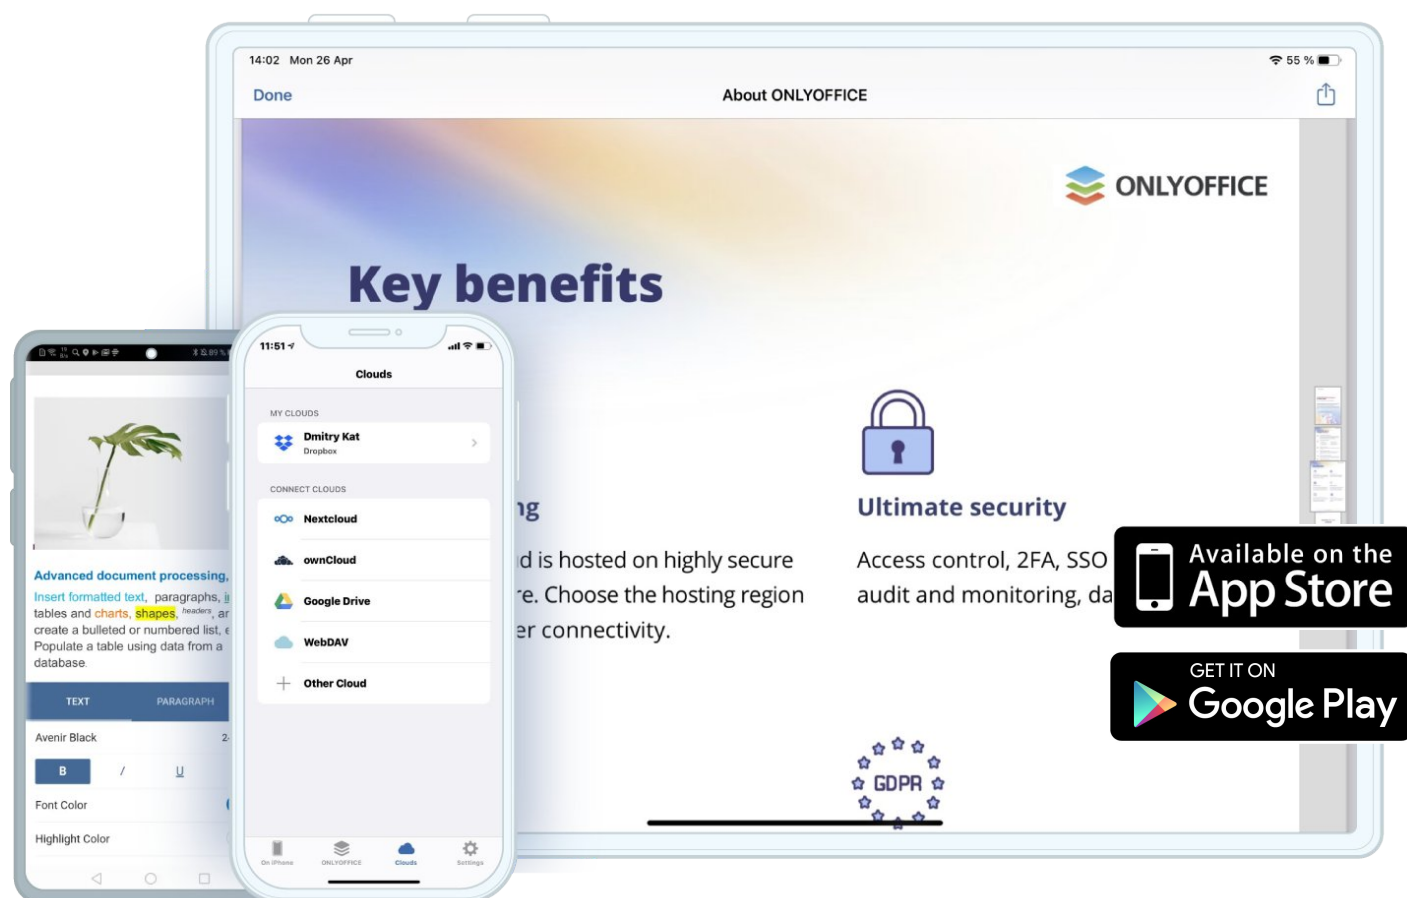

- Features available in your desktop suite instance and not present in the online editor, including local plugins, fonts, and spellchecker.
- Direct access to print service.
- Advanced work with buffer.

Manage docs on the go with free ONLYOFFICE mobile apps

For iOS/Android

With ONLYOFFICE Documents for mobile devices, you can easily connect ownCloud via WebDAV and work with your documents directly from the app.
