

Secure document editing real-time collaboration for the pharmaceutical industry

In their everyday practice, pharmaceutical and biotechnology companies have to deal with plenty of different documents, such as product specifications, instructions, test protocols, internal reports, audit records and marketing presentations.

To help the pharmaceutical industry handle electronic document workflows, ONLYOFFICE Docs offers a complete set of editing and collaborative features. Secure by design, ONLYOFFICE Docs can be integrated into any file sharing environment or used as a component in any web application to provide its users with advanced co-editing capabilities when working on documents in real time.

Why ONLYOFFICE Docs

Feature-rich online editors for text, worksheets and presentations

1. Expert-level editing functionality

Choose from various formatting tools, create and customize complex objects. Add different content controls (plain/rich text, combo box, drop-down list, etc.) and use third-party plugins.

2. Support for all popular formats

ONLYOFFICE Docs is fully compatible with Microsoft Office files and supports other popular formats (ODF, doc, xls, ppt, pdf, txt, rtf, html, epub, csv, etc.).

3. Compliance with security standards

Being 100% open source, ONLYOFFICE complies with all the provisions of General Data Protection Regulation (GDPR) and HIPAA, and is compatible with ISO 27001 and HDS.

4. Data security and control

Encrypt your documents in Private Rooms with an unbreakable AES-256 algorithm and protect your data with HTTPS, JWT and limited cache lifetime.

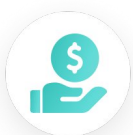

5. Online document collaboration without disruption

Share documents with your colleagues and co-author them in real time. Track changes, browse through file version history, leave comments and communicate via the built-in chat.

6. Deep integration into your infrastructure

Deploy ONLYOFFICE Docs on your own server or in the data centre of your choice using various installation options, such as deb/.rpm/.exe, Docker, virtual appliances, etc.

7. Beneficial terms

- Lifetime license
- Per connection licensing
- Yearly renewal
- One year of updates and support included

ONLYOFFICE Docs integrations

1. ONLYOFFICE Workspace:

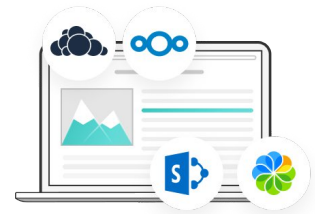

Create and edit documents, work on project documentation, make attachments to mail messages and organize mass mailing within your web office with advanced security features:

- 3 levels of encryption (at rest, in transit, E2EE)
- Two-factor authentication
- SSO: Shibboleth, OneLogin, and AD FS
- LDAP
- Authentication filtering and monitoring
- Data backup & recovery

2. Sync&Share business platforms

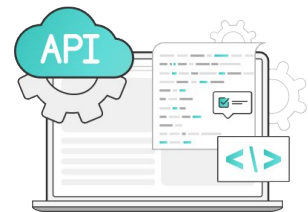

Integrate ONLYOFFICE Docs to enable document editing and collaboration within the content management platform of your choice: Nextcloud, ownCloud, Plone, Alfresco, SharePoint, etc.

3. Embedding into your own solution

Integrate ONLYOFFICE Docs into your own solution with ease:

- Well-documented integration API;
- Any deployment model: SaaS / on-premises;
- All programming languages supported;
- White Label to deliver the editors under your brand

Trusted by 7 000 000 users worldwide
